TRANSVAC PRESENTS COST SAVING TECHNOLOGY AT ASHE CONFERENCE FOR KEEPING HOSPITALS CLEANER

Automated Solution Reduces Labor, Provides Continuous Operational Cost Savings and Improves Hospital Cleanliness and Infection Control

Denver, CO (July 29, 2014) – TransVac Solutions, the trusted leader in automated waste, recycling and soiled linen collection and transport solutions for hospitals, will be exhibiting at booth #209 at the American Society for Healthcare Engineering (ASHE) Annual Conference & Technical Exhibition Aug. 3-6 in Chicago, Ill.

TransVac will present its technology for making hospitals cleaner, reducing infection risk and saving millions in labor and operational costs over the hospital's life cycle. Staff will be available at booth #209 to explain how the system works and the value it brings to hospital operations.

Unlike traditional methods of moving dirty materials through hospitals by means of carts, elevators and gravity chutes, the TransVac solution transports waste, recycling and soiled linen at high speed from every floor through a sealed, dedicated path in the hospital to a central collection point. As a result, clean and dirty pathways are always separate.

“We really make hospitals cleaner and more efficient,” says TransVac President Harry Pliskin. “Hospital environmental services teams are always challenged to do more with less. We help those teams by eliminating the handling of waste, recycling and soiled linen throughout the hospital, returning their time to focus on other activities that promote cleanliness and infection risk reduction.”

All visitors who complete a survey card at the booth will receive a gift and can qualify for a GoPro® camera drawing. For more information about ASHE, visit www.ashe.org.

About TransVac Solutions

TransVac is a Denver-based professional design and engineering company with more than 40 years of success providing turnkey solutions for hospitals, utilizing industry-leading capabilities in LEED, evidence-based design (EBD) and space utilization.

TransVac sets the standard for waste, recycling and soiled linen collection and transport solutions for hospitals. The company provides proven, best practices for making hospitals cleaner, more sanitary healing environments for patients while saving money on the collection and transport of dirty materials. TransVac has installed systems in many of the world's leading healthcare facilities, and continues to expand its advanced technologies into other applicable markets including hotels, airports, mixed-use developments and large entertainment venues.
