### **New Organization Atreo Group Unifies Three Companies Serving North American Healthcare Facilities**

#### *Distinct Brands Remain Under Unified Organization*

Denver, Colo. (March 21, 2016) – Denver, Colo.-based Atreo Group has been established as a unified organization for three independent companies serving the healthcare market including Aerocom Healthcare, TransVac Solutions and Atreo Services. The new name will be introduced today at the International Summit & Exhibition on Health Facility Planning, Design, & Construction (PDC) in booth 1015, San Diego Convention Center, San Diego, Calif.

“We created the Atreo Group to unify three distinct companies that service the common market of hospitals and healthcare institutions,” says Atreo Group CEO Eric Pollock. “Atreo Group helps healthcare facilities run more efficiently. By enabling staff to be more efficient, we help healthcare facilities save time and money and enable those facilities to focus more effectively on patient outcomes.”

Aerocom Healthcare, LLC ([www.aerocomhealthcare.com](http://www.aerocomhealthcare.com)) provides new pneumatic tube systems or expands existing systems within hospitals in the U.S. and Canada. With an installation base of over 1,400 hospitals in 80 countries, Aerocom is one of the largest pneumatic tube system companies in the world.

TransVac Solutions ([www.transvacsolutions.com](http://www.transvacsolutions.com)), established in 1971, is a leading provider of automated waste, recycling and soiled linen collection and transport systems for hospitals in North America and internationally. The company provides proven best practices for making hospitals cleaner, creating more sanitary healing environments for patients while saving money on the collection and transport of dirty materials.

Atreo Services ([www.atreoservices.com](http://www.atreoservices.com)) is a company that provides customized, customer-friendly maintenance and technical support programs for a variety of specialized mechanical/electrical systems within hospitals, including pneumatic tube systems manufactured by the major suppliers to the market. Services include on-demand and preventive maintenance programs, resident technicians, outsourcing, replacement parts, spare parts and accessories.

--MORE--

“Atreo Group leverages the common strengths of our companies, including a strong internal construction management team, project managers and system designers who are highly experienced in BIM coordination and Revit on the largest hospital projects in North America,” says Atreo Group President Harry Pliskin. “We have developed strong relationships with architects, general contractors and owners to provide each hospital solutions that fit their specific needs.”
